NURSERY CALENDAR

JANUARY—Repot house plants in fertilized soil.

FEBRUARY and **MARCH**—Start Tuberous Begonias, Caladiums, Gloxinias and other bulbs in Vermiculite. Seed annuals indoors.

APRIL—Plant shade trees, evergreens, shrubs, hedges, roses, lilies—some perennials. Spray fruit trees. Sow grass seed—fertilize.

MAY—Plant annuals, perennials, tomato plants, shrubs, roses, evergreens, peonies, glads, dahlias, all spring bulbs.

JUNE—Plant annuals and perennials, potted roses and shrubs. Dust or spray roses and flowering plants periodically from now on.

JULY—Plant perennials in bloom, Phlox, Delphinium, Daylilies, etc.

AUGUST—Select and plant Mums, seed lawns.

SEPTEMBER—Plan landscaping with evergreens, etc. Plant Madonna Lilies, some Holland bulbs. New bulb list available at nursery.

OCTOBER—Plant Tulip bulbs, shrubs, shade trees, evergreens.

NOVEMBER—Cover perennials with hay. Cover Roses with peat and hay. Put garden tools away.

DECEMBER—Pick out Christmas trees, also wreaths, centerpieces, tree lights, decorations, etc. Make selection early, trees reserved.

1 lb. -----\$3.65

WHITE DUTCH CLOVER

Good addition to lawn seed. Adds nitrogen to the soil. Thrives best under cool moist growing conditions in fertile soils, with plenty of lime.

1 lb. -----\$1.50

CREEPING BENT ASTORIA

Very fine, rich green leaf blades, spreads by underground runners. Does well in sun or shade.

1 lb. -----\$1.60

CYCLONE GRASS SEED SPREADERS RENTED 25c A DAY.

LAWN CARE

Seeding should be done in spring or early fall. All perennial grass seeds are best. Merion Blue Grass is far superior in hardiness, heat and drouth resistance. One pound will cover twice the area of other seeds—it's well worth the extra cost.

Keep soil wet during seed germination.

A high nitrogen fertilizer should be used at least twice a year on lawns.

We recommend special long lasting lawn fertilizers such as Turf Food, Northrup King Lawn Food or Golden Vigoro, applied about 2 lbs. to 100 square feet.

Lime added once a year will help make a hardy green lawn.

Crabgrass and weed killers work best in May and June.

INSECTICIDES AND FUNGICIDES

We carry a complete line of **ORTHO** and **ACME PRODUCTS** including Rose Dust, Vegetable Dust, All Purpose Dust and Sprays, Fruit Tree Sprays, Crabgrass Killers, Weed Killers, etc.

GARDEN TOOLS AND SUPPLIES

We carry **TRU-TEMPER**, **AMES**, **WISS** and **SEYMOUR SMITH** tools. Also flower pots, bird baths, garden stakes, fencing, trellises, lawn sprinklers, garden hose and lawn edging.

WENONAH. Very free and early flowering soft lavender-pink, 18 inches.

WHITE CLOUD. Large feathery, pure white, very strong plant. The most satisfactory white Mum for garden, 26 inches.

W. P. SNYDER. Fully double apricot bronze, compact growth, 26 in. tall, 30 in. wide.

Each 55c

Care of Chrysanthemums

Hardy Mums are very easy to grow. Plants set out in the spring will become large blooming plants $1\frac{1}{2}$ to 2 feet across.

Mums do the best in full sunlight, but may be planted where they get three or four hours of shade.

Pinching out the tips of taller varieties to encourage branching should be done several times—until July 15th. The pinching makes the plants sturdy and bushy.

During the summer the soil around Mums should be cultivated regularly to keep weeds down and to maintain moisture. A well-balanced commercial fertilizer should be applied two or three times during the summer. The plants should be watered well after fertilizing.

Use all-purpose dust occasionally to control insects and foliage diseases.

Mums can be planted at almost any time during spring, summer, or early fall. They can be moved in full bloom to plant in window boxes, or in borders where flowers are needed. One can have a new border overnight by replacing old flowers with fresh blooming Mums.

Chrysanthemums may be selected from colored pictures at the Nursery.

HARDY CUSHION CHRYSANTHEMUMS

AUTUMN BEAUTY. Very early large brilliant, sparkling reddish chestnut, 15 inches.

CREAMPUFF. Light yellow sport of Powderpuff. Dwarf cushion plant, 12 inches.

LIPSTICK. Deep strawberry red cushion, 15 inches.

- THE ADMIRAL.** An effective intense blue, deeper than medium. each 75c
- VELVET DUSK.** Very rich, deep black-violet. each \$1.00

CARE OF IRIS

Iris will grow in almost any soil if there is sun and good drainage, but are most satisfactory in fairly sandy soil with some humus added.

The rhizomes should be planted just below the surface of the ground—no deeper. Use about one cupful steamed bone meal per square yard.

HARDY LILY BULBS

FOR SPRING PLANTING

- AURATUM**, the "Gold Band Lily," white, spotted crimson, gold stripes, sweet-scented. each 85c
- CENTIFOLIUM**, a new super-Regale, huge white flowers, tinted brownish-pink outside. each 85c
- CORAL LILIES**, small coral-red, waxy flowered, very showy during June and July. 2 for 50c
- HENRYI**, tall, deep peach. each 50c
- REGAL**, large trumpet shaped white, sweet-scented flowers, tinted pink on the outside, July, 3 to 5 ft. each 50c
- RUBRUM**, lovely pink with darker dots and shading, September, 3 to 5 ft. each 85c
- UMBELLATUM**, large deep red, shaded crimson flowers in June, 12 to 15 inches. each 60c

Following Lilies From Jan de Graaff

- RED CHAMPION**, a selected Speciosum Lily, very rich color, late August and early September. each \$1.00
- MID-CENTURY HYBRIDS**, selected for beauty, hardiness and vigor, mixed of brilliant colors. each 50c, 3 for \$1.40

- SUNBURST**, new, exotic lilies, 5 to 7 ft. stems with 30 huge blooms in late July, soft pastel shades. each \$1.35
- GREEN MOUNTAIN HYBRIDS**, predominantly greenish-bronze in appearance. each \$1.35
- FIRE FLAME**, large widely expanded crimson-red flowers. each \$1.00
- OLYMPIC SELECT**, large, formal, waxy white trumpets, pink or white outside. each \$2.50, 3 for \$7.00

FOR FALL PLANTING

MADONNA LILY, lovely, pure white, sweetly scented blooms in early June. Plant in groups of three or more in August or September.

PLANTING OF LILIES

With a properly made bulb bed and good bulbs one can look forward with certainty to a harvest of beauty.

Good drainage is the first consideration; then the preparation of the soil.

Peat or leaf mold should be added, and bone meal—or a special bulb fertilizer.

The depth of planting varies with the species; normally it should be about three times the height of the bulb. That is, if the bulb is three inches high, its base should be nine inches deep.

According to rooting habits, there are two main classes of lilies. Those of one class product roots from the base of the bulb only; the other kind develop feeding roots along the stem between the bulb and the surface of the ground and the base of the bulb.

Most of the lilies we offer are stem rooting. The Madonna Lily is base rooting.

Lilies require a year round mulch to keep the soil mellow and to conserve moisture, are fragrant at some time of the day.

ROSES

EVERBLOOMING HYBRID TEAS

ALL TWO-YEAR No. 1—TOP SIZE—ROSES

Everblooming roses produce beautiful flowers over a long season. Practically all are fragrant at some time of the day.

Guarantee for Roses

Full replacement for the first season.

Please follow planting directions.

Important Directions For Planting Roses

Dig holes for roses 18 inches wide and 18 inches deep. Mix our special "Rose Food" and rich soil or peat with dirt taken from holes. Set roses deep with crown or graft 2 inches below ground level. Fill with mixed soil and hill up 4 or 5 inches. Build a soil basin to hold water.

Unsprouted roses should be soaked in a pail of water one day before planting, and then kept covered with a wet cloth until sprouted. Water every other day until started. Dormant roses take from 2 to 5 weeks.

For better blooms, foliage, color and even better fragrance, use a liquid fertilizer every 15 days all summer.

HEDGES

ALPINE CURRANT, dwarf compact shrub, dark green foliage
9 to 12 inches.....10 for \$ 5.50
30 for 15.75

Guarantee

Full replacement on evergreens for one year from time of purchase.
Planting labor not included in guarantee.

PLANTING DIRECTIONS FOR EVERGREENS

Dig hole a foot larger and deeper than ball of earth on evergreen. Set tree a little lower than it stood in nursery, leaving the burlap around the ball of earth. Fill around ball with rich soil, pack firmly and fill hole with water. When settled, fill hole with soil, pack firmly, and leave top of ground covered with loose earth. Water well twice weekly.

Fertilize with our special Evergreen, Tree and Shrub Food.

SHADE TREES

Mountain Ash

A valuable ornamental tree with scarlet berries in late summer.

8 to 10 feet-----\$5.00

Lake City Elm

A grafted form of American Elm, upright, closely branched, symmetrical and graceful, fast growing.
